SUMMARY

2026 B.Tech Information Technology graduate from VIIT Pune with 6 months of Software Engineering experience at Qualys. Designed and built an AI-driven agent framework using MCP servers and Playwright within a cybersecurity product environment. Proficient in Java, Spring Boot, Angular, and REST APIs. Seeking entry-level Software Developer roles in Pune.

EDUCATION

- Vishwakarma Institute of Information Technology** Pune, India
Bachelor of Technology - Information Technology; GPA: 8.0 October 2022 – June 2026

SKILLS SUMMARY

- Languages:** Java, C/C++, SQL, JavaScript, TypeScript, HTML, CSS
- Frameworks:** Angular, Spring Boot, Express.js, Hibernate, JPA
- Web & APIs:** REST API, JSON, API Integration
- Databases:** MySQL, MongoDB
- Tools:** Git, GitHub, IntelliJ IDEA, VS Code, Postman
- Concepts:** OOP, SDLC, Agile, Microservices
- AI & Automation:** MCP (Model Context Protocol), Playwright, Windsurf
- Soft Skills:** Leadership, Teamwork, Communication, Time Management, Decision-Making

EXPERIENCE

- Qualys, Pune**
Software Engineering Intern Jan 2026 – June 2026
 - AI Framework Development:** Designed and built an AI-driven agent framework from the ground up, architecting MCP (Model Context Protocol) servers integrated with Playwright via CDP to enable autonomous UI navigation, multi-step workflow execution, and output validation from a single natural language prompt — eliminating manual VMDR feature verification effort.
 - Backend Development:** Developed and maintained Spring Boot REST APIs as part of the VMDR backend, contributing to feature development and API integration within a production cybersecurity platform.
- Institute Industry Interaction Cell & TPO, VIIT Pune**
Associate Industry Relations Manager October 2024 – December 2025
 - Industry Relations:** Organized and managed 10+ placement drives, collaborating with 200+ alumni and industry recruiters to facilitate student placements.

PROJECTS

- Event Hub: MEAN stack** event enrollment platform with **JWT authentication**, role-based access control, Angular reactive form validation, RESTful APIs, and responsive **Bootstrap UI**. (Dec 2024)
Tech: Angular, Node.js, Express.js, MongoDB, Bootstrap
- Programmer's Calculator:** **Angular**-based programmer's calculator with real-time state management via services, supporting arithmetic, bitwise, and base-conversion operations with a responsive **Bootstrap UI**. (Jan 2025)
Tech: Angular, Bootstrap
- Restaurant Record Management:** Full-stack restaurant management system with **Angular** frontend, **Node.js/Express REST API** backend, complete **CRUD operations**, and **MongoDB** persistence. (Feb 2024)
Tech: Angular, Node.js, Express.js, MongoDB

CERTIFICATIONS

- IBM Full Stack Software Developer:** Coursera & IBM (March 2025)
- Angular with MEAN Stack:** Marvellous Infosystems (October 2024)
- Data Structures & Logic Building:** Marvellous Infosystems (January 2024)

AWARDS & ACHIEVEMENTS

- Event Manager of the Year:** National Institute of Event Management (2025)
- TechnoFia 2.0 Hackathon:** Finalist (2025)
- DSA Practice:** Solved 130+ problems — LeetCode & GfG
